

Draw Line Graphs

- 1) Class 5 measured the height of a sunflower over seven weeks. Here is the table of data that shows their results.

Week	1	2	3	4	5	6	7
Height (cm)	52	59	66	72	78	88	93

Draw a line graph to represent the data.

A Line Graph to Show _____

- 2) Class 6 also measured their sunflower's height. Here is the table that shows their results.

Week	1	2	3	4	5	6	7
Height (cm)	55	60	64	70	74	80	85

Represent this second set of data on your line graph. What do you need to include when showing two sets of data on one line graph?
